- <<GRB can replace the PDF number with the SDMS number, if the images are in SDMS.>>.
- Yes, they are in SDMS, styled like the screen print below shows. The barge cleaning job number is in the title line, as is the generator name. Do you need a mod of the previous TO from Patrice to do this or can I give you a new task order under my TO7? Don't know if Patrice is here today.

Barbara:

The answers to your questions are as follows:

- The 2-digit number in the PDF column on the "Material" tab refers to the PDF file which contains the image range specified in the next column. GRB received PDF files #1 through #22 from EPA in a folder named "Working Casales."
- GRB can replace the PDF number with the SDMS number, if the images are in SDMS. The images in the PDF files do not have bar codes.
- The purpose of Column C on the Client-Contact tab was to provide current contact information, address and telephone number, if they could be located. In some instances, internet searches found corporate information, but GRB was not specifically tasked to do corporate research.

Please let me know if you have any other questions.

Louise

Patrice/Kim/Louise:

On the tab "Material," the first column is "pdf document" with a 2-digit number. What does this number refer to? Is it possible to revise this TO and the spreadsheet to add the SDMS number that corresponds with the 'pdf document' number in this column? And does Tab "Client-Contact" column B to Col. C reflect research to determine if the entity in Col. C is the present form of the entity in Col. B?

Patrice:

Per the direction received from you on March 2, 2009, GRB has revised the Client Contact spreadsheet and a copy is attached. Hard copy documentation was obtained for all entries and that material under a cover Memo-to File has been entered into SDMS as document ID #861874.

kim - please rename the spreadsheet in question with a new date and by cob thursday, replace "alternate source" with the name of the alternate source. hard copy sources should be gathered and covered with an roc that features a heading of "prepared in anticipation of litigation/ work product" and submitted for day forward processing. provide revised spreadsheet and sdms number of backup docs by due date. thank you.

Q on Gulfco Task - Contact information (from alternate sources) on client-contact tab of spreadsheet

Barbara to: Patrice Miller
Aldridge

Hi P:

On the excel spreadsheet that GRB did sometime back for the Gulfco task on the sampling comparison against the generator documents from the barge cleaning operation, there is a tab called "client-contact." The 3rd column is "contact information (from alternate sources)." Can I get their 'alternate sources' documentation? That is, what were the alternate sources, (i.e., internet, corporate searches?), and the print-outs of the search results.

Thx

Barbara
